TRENTON Formalizes Partnership with Dialogic

Trenton and Dialogic Products Deliver Long-life Value and Performance in Communication Systems Based on Open Standards.

Atlanta, GA – Trenton single board computers and backplanes have been working together with Dialogic boards and software in communication systems and industry application segments for years. Customers utilizing Trenton's embedded computing boards and rackmount computer systems with Dialogic products are able to deliver long-life communication systems that are based on open industry standards. These Trenton/Dialogic systems are operating worldwide in diverse market segments and applications such as Telephony, Media Gateways, Military COTS Communications, SS7 and ATM Networks. Trenton's dedication to designing and manufacturing true COTS hardware and validating 3rd party board and software solutions enables us to deliver on the promise of a truly open system architecture solution. Today, many of our OEM and integration customers are successfully deploying Dialogic's telephony signaling and communication boards in systems using Trenton Technology's single board computers, system host boards, and backplanes.

“Long-life embedded computing hardware has always been Trenton's focus and Dialogic has been there for us and our mutual customers for many years”, said Bill Bowling, Trenton's Vice President & General Manager. “ We have worked well together in the past and look forward to continuing and enhancing this relationship with our membership in the Dialogic Partner Program”.

For more information on Trenton's partner program go to the Partner Center on the Trenton website.

About Trenton Technology

Trenton is a specialized designer and manufacturer of AMCs, industrial computer systems, system host boards, single board computers, motherboards and backplanes for critical embedded computing applications such as telephony, imaging, instrumentation, control and others that require performance, precision and reliability. Trenton is a member of the Intel[®] Embedded and Communications Alliance, a community of embedded developers and solution providers.

Trenton offers AMC, PCI Express, PCI-X/PCI/ISA and CompactPCI[®] board- and system-level industrial computer products manufactured in ISO 9001:2008 certified USA facilities to various industry standards such as CE, CSA and UL. Trenton's focus is on exceeding our customer's, expectations for features, performance, vendor reliability and manufacturing quality. All Trenton Technology PICMG 1.3 and PICMG AMC.0 products are backed by a full five-year warranty and Trenton's engineer oriented technical support.

About Dialogic

Dialogic Corporation is a leading provider of world-class, innovative technologies based on open standards that enable innovative mobile, video, IP, and TDM solutions for Network Service Providers and Enterprise Communication Networks. Dialogic's customers and partners rely on its leading edge, flexible components to rapidly deploy value-added solutions around the world.
