TRENTON Updates Now Available On Social Media Websites

Twitter, Facebook and LinkedIn Provide Additional News Sources for Trenton Product and Company Information.

Atlanta, GA – Trenton is always seeking better ways to keep our customers up to date on the latest advancements in embedded computing technology. We are pleased to announce that Trenton now utilizes the social media services of Twitter, Facebook and LinkedIn to enhance our standard company website, e-mail and customer phone call methods of disseminating technical product information. These services allow us to meet the needs of our customers who rely on Twitter, Facebook and LinkedIn for up to the second information updates. Twitter, Facebook and LinkedIn will enable Trenton to keep our customers better informed on new product features, technical updates and product application bulletins for our single board computer, backplanes and embedded computing systems.

“Social media has branched out and is becoming a source for quick and concise product information and technical updates for many of our customers”, said Michael Bowling, Trenton’s Director of Operations. “A growing portion of our customer base likes to receive product and technology updates via Twitter, Facebook or LinkedIn that they can use and share with their colleagues. These social media services enable us to meet these emerging informational needs”.

You can view Trenton’s latest information such as the latest update on a couple of interesting cluster computing applications on Twitter at www.twitter.com/trentontech. Click on the Join Today button at the top of our Twitter page to begin receiving Trenton’s Twitter updates automatically on your PDA or PC.

You can find us on Facebook by typing in Trenton Technology in the search field of your Facebook page or you can use this hot link to go directly to our [Trenton company profile page on Facebook](#).

You can find us on LinkedIn by selecting the Search Companies option in the first search box and then typing in Trenton Technology in the second search field at the top of your LinkedIn page. You can also use this hot link to go directly to our [Trenton company profile page on LinkedIn](#).

About Trenton Technology

Trenton is a specialized designer and manufacturer of AMCs, industrial computer systems, system host boards, single board computers, motherboards and backplanes for critical embedded computing applications such as telephony, imaging, instrumentation, control and others that require performance, precision and reliability. Trenton is a member of the Intel[®] Embedded and Communications Alliance, a community of embedded developers and solution providers.

Trenton offers AMC, PCI Express, PCI-X/PCI/ISA and CompactPCI[®] board- and system-level industrial computer products manufactured in ISO 9001:2008 certified USA facilities to various industry standards such as CE, CSA and UL. Trenton's focus is on exceeding our customer's, expectations for features, performance, vendor reliability and manufacturing quality. All Trenton Technology PICMG 1.3 and PICMG AMC.0 products are backed by a full five-year warranty and Trenton's engineer oriented technical support.
