TRENTON Announces Toys for Tots Drive

Trenton Technology local drop off point for Hall County

Atlanta, GA –Trenton Technology announced today they have been designated to be a Toys for Tots drop of point for Hall County, Georgia. Trenton Technology manufactures [single board computers](#), [backplanes](#) and [rackmount computers](#) that are designed into critical military applications. “Supporting Toys for Tots was a natural selection for our philanthropic efforts”, says Dwight Justice, VP of Sales. “Trenton appreciates the sacrifices of the US military and wanted to find a way to support our troops and their families this holiday season. We are proud to be a drop off point here in Gainesville, GA and hope the community comes out to support our troops.”

The objectives of Toys for Tots are to help less fortunate children throughout the United States experience the joy of Christmas; to play an active role in the development of one of our nation’s most valuable resources – our children; to unite all members of local communities in a common cause for three months each year during the annual toy collection and distribution campaign; and to contribute to better communities in the future.

Bill Bowling, Vice President and General Manager of the Computer Products Division said “ As a veteran myself, we couldn’t think of a more worthy cause to help this holiday season. Our employees are excited to make a difference in many military families’ holiday season.”

If you would like to make a donation, Trenton Technology is located at 2350 Centennial Drive, Gainesville, GA 30504. We are open for donations from 9am – 5pm EST, M-F.

About Trenton Technology

Trenton Technology is a designer and manufacturer of single board computers, backplanes, and complete industrial rackmount computer systems for critical embedded computing applications. Applications from the military, DoD, medical instrumentation, and industrial control that require performance, precision and reliability all depend on Trenton products. Trenton is a member of the Intel[®] Embedded Alliance, a community of communications and embedded developers and solution providers.

Trenton offers PCI Express, PCI-X, PCI, ISA and MicroTCA[®] board- and system-level industrial rackmount computer products manufactured in an ISO 9001:2008 certified USA facility. All Trenton Technology PICMG 1.3 products are backed by a full five-year warranty and Trenton's no charge technical support.
